

APMD Pre- or Post-Stamp Case Packer

An efficient tool for increasing productivity to your stamping operation.

Complemented with United Silicone's tax stamping machines, the Universal Case Packer packs cigarette cartons back into cases at a rate of up to 100 cartons per minute. The machine self-adjusts to accept varying carton sizes. Flexible side plates float to accommodate packing Regular to 100 carton sizes - making it also ideal for post stamping operations. Cases are held in place requiring no operator involvement. The Case Packer integrates with United Silicone branded Tax Stamping Equipment, as well as others, and can be controlled from the touch-screen which includes stopping and starting to prevent jamming.

Specifications

Speed: 100 Cartons/Minute

Maximum Height: 8'4"
In-Feed Conveyor Height: 2'8" - 3'0"
Weight: 620 lbs.
Shipping Weight: 780 lbs.
Electrical: 120 VAC, 15AMP
Air: Clean, Dry Air Requirement - 13CFM @ 100PSI

HCC-612 Case Cutter

A compact, case-cutting solution for locations with increasing inventory.

Similar to its full-sized counterpart, the HCC-612 "Half-Sized" Case Cutter cuts both 6M and 12M cigarette cases simultaneously without an operator or adjustments needed. Suction cups pull away corrugate from inner cartons while rotary blades cut cases minimizing damage significantly. The HCC-612 Case Cutter is ideal for locations that are increasing variety and 6M case inventory but may not have the space for a full-sized CC-612 Case Cutter. The HCC-612 can also be configured as an in-line cutter.

Specifications

Speed: Cuts 6M and/or 12M at 7.5 Cases/Minute
Length: 10'5"
Side Width: 4'0"
Weight: 1,950 lbs.
Shipping Weight: 2,200 lbs.
