

## Ancillary Equipment

United Silicone's ancillary items are designed to work great for specific customer demands.

### The Hot Hand 300 Hand Iron

The Hot Hand 300's dual heads are interchangeable to stamp both 1x10 and 2x5 carton configurations. With an adjustable temperature range from 260° F to 340° F and weighing in at only three pounds, the Hot Hand 300 is one very versatile hand-stamper. A "cool touch" ergonomic handle, an illuminated on/off switch and a heat-resistant power cord also make the Hot Hand 300 a very safe solution to your stamping needs.

### Air Compressor Package

United Silicone's Air Compressor Package includes a 5.0 HP compressor producing 18.1 CFM at 90 PSI, a compatible refrigerated compressed air dryer, all required fittings, and installation. Both the compressor and dryer are engineered for 100% continuous duty. The air dryer eliminates troublesome water and removes unwanted particles to the micro level prolonging the life of your tax stamping equipment and reducing the need for costly service in the future. Clean, dry air is a standard requirement for United Silicone equipment installation and warranty coverage. United Silicone's Air Compressor Package is highly recommended for all United Silicone's tax stamping machines, case packers, and case cutters.

### Hand Held Pressure Sensitive Marker

United Silicone's Electronic Marking System (EMS) is a light weight, pressure sensitive label marker perfect for both low quantity stamping or branding operations and easy entry into stamping other tobacco products (OTP). Due to its construction features, the stamp cartridge has a quick release and load making it is easy to operate and maintain.
