

Encrypted Stamp Machine

United Silicone's Encrypted Stamp Machine increases productivity while providing quality stamping.

United Silicone's Encrypted Stamp Machine increases productivity while providing quality stamping. Perfect for high volume pre- and post-stamping operations, this machine automatically adjusts for stamping Regulars, Kings, 100s, and 120s.

The Encrypted Stamp Machine utilizes a reel-to-reel and vision system that applies and monitors digital stamps, required by some states. The user friendly touch-screen guides operators monitoring production and directs in diagnostics. This machine integrates seamlessly with the Universal Case Packer.

Machine Highlights

- High-Speed Stamping
- Advanced Camera System; reads and analyzes data quickly
- Adaptive Stamp System; measures carton length and applies stamps accordingly
- MSA System; verifies product information with state database
- Stationary Carton Opener and Closer; reduces moving parts
- Pressurized, Vertical Glue Pot; precisely applies glue and firmly secures cartons
- Servo-Driven Chain System; built-in torque overload sensor

Options & Accessories

- Universal Case Packer
- Lateral Packing Conveyor
- Packing Table
- Angled Drop Table
- Remote Troubleshooting
- Compressed Air System

Specifications

Pre-Stamping: 100+ Cartons/Minute
Post-Stamping: 30-50+ Cartons/Minute
Depth: 7'1"
Width: 10'1"
Maximum Height: 6'0"
Weight: 1,800 lbs.
Weight with Universal Case Packer: 2,600 lbs.
Electrical: 220 VAC, 30AMP Single Phase
Air: Clean, Dry Air Requirement - 3CFM@ 90PSI
